$> ABOUT ME

I'm currently studying at 42 school Paris where I worked on several individual and group projects such as those you can see below. Through these different experiences, I learned about web languages and some of the most popular and newest web technologies. My goal is now to contribute my skills and experiences to a team and to progress with it.

$> 42 SCHOOL, PARIS (2017-now)

War-Era
Online game app, geopolitical simulation.
> *Imagined and developed the entire project.*
> *Produced a RESTful API.*
> *Organized clean and easily scalable code and architecture.*
> *Created and maintained a web server on a Virtual Private Server.*

Hypertube
Netflix like, streaming website with live torrent downloading on server.
> *Designed and developed an user-friendly interface with Material-UI.*
> *Linked 2 extrnal APIs to the app.*
> *Implemented a live translation with redux.*

Matcha
Tinder like, dating website, matching people around you with popularity score algorithm.
> *Used React.js to make a single page app.*
> *Developed a chat with socket.io.*

Camagru
Instagram like, take picture with the device, apply filter on it and share it.
> *Used MVC architecture.*
> *Created own PHP microframework.*

Lem-in
Pathfinding.

Push-swap
Sorting algorithm.

ft_printf
Replica of printf function.
